
Analytical index

Analytical index

- abnormal sensory experiences, 191, 193, 199, 202, 203
- acute neonatal problems, 313
- aetiologies, 228
- alar plate (sensory neurons), 13
- anatomy and neurology of saliva secretions, 333
- anthropometry, 87
- anticipatory and preventative strategies, 312
- articulation, 274, 279
 - skills, 335
- articulatory system, 56
- artificial feeding, 255
- assistive technology 293
- basal plate (motor neurons), 11
- behaviour, 142
 - management, 341
 - approaches, 341
- biochemical analysis, 88
- bone mass density, 88
- botulinum toxin, 344
- brain stem dysgenesis, 150
 - classification, 151
 - clinical findings, 153
- brain stem lesions, 147, 149
- branchial arches, 8
- breathing, 27, 29, 277
- bulbar form of cerebral palsy, 139
- bulbar impairment, 141
- catalysts, 52
- cerebral hemispheric lesions, 137, 139
- cerebral palsy, 265, 267
- cleft palate, 128
- clinical follow-up findings, 157
- clinical scales, 187
- cognition, 53, 142
- communication, 203, 205, 222, 353
 - assessment, 291
 - development, 219, 221, 287
 - systems, 285, 287
- compensation and maintaining function, 309
- complementary exams, 186
- congenital neuromuscular disorders, 299, 301
- constipation, 90, 260

- coordination of subsystems, 274
- cranial facial syndromes and conditions causing OMD, 131
- craniofacial anatomical malformations, 125, 127
- craniofacial conditions, 196
- craniofacial microsomia, 132
- cue-based feeding, 30
- chronic childhood issues, 314
- delayed gastric emptying, 90
- dental decay, 359
- dental examination, 173
- development of oromotor functions for feeding, 23, 25
- development of speech, 43, 45
- developmental oral feeding focuses, 25
- diagnosis, 143
 - in childhood, 159
 - in infancy, 154
- dietary adaptation, 250
- differential diagnosis, 270
- digestive tract disorders, 89
- dose, 108
- dribbling, 141
- drinking, 216, 217, 220, 337,
- drooling, 222, 331, 333, 334, 359
 - assessment, 334
 - measurement, 337
 - medical treatments, 343
- dysarthria, 167, 265, 267, 268
 - types, 270
- dysphagia, 167, 359
- early childhood, 220
- early development and segmentation, 5
- early infancy, 216
- early infant communication, 45
- eating, 216, 217, 220, 337
- embryonic development, 27
- enteral nutrition supplements, 256
- enteral tube nutrition, 256
- environmental stimulation, 54, 181
- epidemiology of oromotor disorder for feeding, 228
- facial expression, 168
- facial paralysis, 130
- feeding, 141
 - assessment, 73
 - changes, 32
 - development, 178, 180
 - of healthy preterm infants, 29
 - disorders, 175, 177, 186, 187
 - impairment, 167
 - position, 255
 - skills, 184
 - trial, 74, 233
- fluoroscopic technique, 107
- foetal development, 27
- functional anatomy, 3, 5
- functional examination of the oral structures, 71
- gastroesophageal reflux, 89, 194, 258
- gastrointestinal issues, 303
- gastroparesia, 260
- genetics, 143
- gross motor, 335
- histogenesis, 9
- hospitalisation, 193, 203
- hydration, 253
- illness, 193, 203
- indirect calorimetry, 88
- infant cry, 45
- infants born prematurely, 33
- instrumental examination of the pharyngeal phase, 236
- International Classification of Function, Disability, and Health, 290
- intervention for oromotor disorders associated with feeding, 237
- intraoral appliances, 342
- language, 53
- late preterm infant feeding, 32
- later childhood and adolescence, 223

- later infancy, 217
 literacy, 222
 macroglossia, 128
 management, 144
 – considerations, 239
 – of oromotor disorder for feeding, 225, 227
 – of oromotor disorders in childhood, 213, 215
 – principles, 237
 maternal factors, 183
 maturational factors, 181
 measures of impairment, 272
 mechanical ventilation, 196
 medical conditions, 182
 medications, 343
 micrognathia, 127
 Möbius syndrome, 133
 motor, 142
 neonatal period, 216
 neurological impairment, 225, 227, 228, 229, 236
 neuromuscular diseases, 168
 neuromuscular disorders, 313
 neuronal circuits and functions, 15
 neuropathological findings, 156
 nipple feeding, 32
 NOMAS, 187
 non-cooperative children, 78
 non-nutritive sucking, 30, 31
 normal saliva flow, 333
 nutritional assessment, 84
 nutritional evaluation, 81, 83
 nutritional status test, 86
 nutritional support, 247, 249, 250
 nutritive sucking, 31
 oesophagitis, 90, 259
 oral examination, 232
 oral feeding skills, 25
 oral health, 339
 oral reflexes, 71
 oral skill, 32, 34
 oral structures, 68, 141
 oromotor
 – control, 50
 – difficulties, 191, 193
 – disorders arising from neuromuscular diseases, 163, 165
 – disorders assessment, 171
 – disorders symptoms, 165
 – examination, 171
 – functions affected by neuromuscular diseases, 167
 – intervention, 340
 – skills, 335
 – system, 63, 65
 parent-child interaction, 220
 parents, 217
 phonation, 273, 278
 phonatory system, 55
 physical examinations, 186
 physiologic constraints, 53
 physiology, 230
 – and development/maturation of cough, 29
 Pierre Robin sequence, 131
 premature infants, 175, 177, 178, 180, 184, 186, 187
 prematurity, 195
 present-day feeding, 73
 prevalence of drooling, 334
 procedures, 345
 production constraints, 52
 prognosis, 159
 prosody, 274, 279
 protophone development, 46
 rehabilitation, 305
 resonance, 279
 – nasality, 274
 – system, 57
 respiration, 301
 – and breath support for speech, 272
 respiratory and neurologic bases of oral feeding, 26

- respiratory system, 54
- rhythmic sucking and swallowing in preterm infants, 31
- saliva, 331, 333
 - control, 167
 - assessments, 335
 - production, 333
- school age, 221
- seating strategies, 108
- seizures, 142
- semi-demand feeding, 30
- sensory evaluation, 67
- Shprintzen syndrome, 132
- social barriers experienced by people with oromotor disorders, 352
- social development and psychosocial well-being, 357
- social issues of oromotor disorders, 349, 351
- societal attitudes towards people with oromotor disorders, 356
- specific consistency of foods, 251
- specific treatments, 250, 258
- speech, 47, 48, 50, 141, 222, 277
 - and language therapy technique, 101
 - assessment, 75
 - development, 51, 52
 - production, 267
 - sound production, 58
 - therapy, 265, 267
 - subsystems, 54
 - wider impacts of speech disorder, 276
- Stickler syndrome, 132
- sucking, 27, 29
- suctioning, 196
- supporting communication and learning with
 - non-speech methods, 288
- surgery, 345
- surgical management
 - of cleft lip and palate, 322
 - of facial paralysis, 326
 - of mandibular hypoplasia, 319
 - of velopharyngeal insufficiency, 324
